10. Difference between the courses available in the same department

The relevance of computers in Business is increasing each and every day. Computers play a vital role in managing various accounts related to the business. The course 'B.Com CA' focuses on the application of computers in business. This course has a great scope in the field of both commerce and software.

Seventeen core papers are common for B.Com and B.Com CA Degree Courses. Additionally, eight

theory papers and five practical papers are included in B.Com CA Degree Course, like, Introduction to Information Technology, Database Management System, Object Oriented Programming with C++, E-Commerce, Visual Basic, Internet and Web Designing, Cyber Law. Practical papers are included, such as MS Office, C++, Oracle, Visual Basic and HTML, in order to get familiarity with programming and computer hardware and software along with core commerce.

The subjects that are given in both the courses are similar; however, they have second major in computers. This would help the students in going for MCA or more specialized field in Masters Degree Course in commerce and computer background.

B.Com CA students can find lot of career opportunities in the fields of Accounting, Banking, Marketing, E-Commerce, Teaching, Insurance and Stock Markets. These graduates can also find lucrative jobs in the software industry.
